### A question of security

A workshop conducted by i3indya Technologies threw light on the modalities of ethical hacking

DECCAN CHRONICLE

Ethical hacking is serious business these days. To cater to this increasing demand, certified courses are now being offered by many institutions.

Around 300 students from various colleges attended a workshop on 'Ethical Hacking and Cyber Security' that took place in J.B. Institute of Engineering and Technology, near Chillkur. It was organised by i3indya Technologies and students from across 20 colleges looking for a career in cyber security attended the event.

S. Yugandar, CSC student of AVR & SVR College, said, "I always wanted to learn what ethical hacking was all about, and after attending this workshop, I got to know how I can keep my system safe from hacking."

"Knowing about ethical hacking will help prevent ideas from being stolen when one takes up a job. It is also very important for us to be up to date with cyber security," opined Phanindra Kasyap of JBIT.

Sanskruti Mishra, a computer science student, learnt that hacking might not always be illegal. "It could be an interesting career. Hacking into others computer is illegal, but creating awareness that someone's system is not safe and alerting them is legal," she explained.
